

## PUBLIC AWARENESS

### Pipeline Purpose and Reliability

Pipelines are an integral part of America's transportation network that delivers vital resources to your home, your work place and your community. Propane pipelines supply the energy for heat, lights and various energy needs that help us maintain our quality of life. Propane is the cleanest of the conventional fuel sources available to provide the energy that America needs. Pipelines are considered to be the safest way to transport propane.

### Damage Prevention

Protect yourself, your property and family from injury. At least two business days before you dig, auger or move dirt in any way in Arizona, call Arizona BlueStake 1.800.782.5348 or dial 811. SemStream Arizona Propane will arrange to mark underground propane pipelines so you can work safely.

If you see suspicious activities or other non-routine excavation around pipeline facilities or pipeline right-of-way, immediately report it to SemStream Arizona Propane at 928.645.2391.

### Awareness of Hazards and Prevention Measures

If you come in contact with a propane pipeline or suspect a pipeline leak, take the following steps:

- Leave the area immediately

- Move to a safe location and then call SemStream Arizona Propane at 928.645.2391
- Abandon any equipment being used in or near the suspected leak
- Warn others to stay away when possible

### Leak Recognition

Learn the warning signs of a propane pipeline leak:

- A rotten egg smell
- Dirt spraying in the air
- A hissing sound
- Bubbling in a pond, creek or river
- Dead or dying vegetation

### Leak Response

When a leak occurs:

- Do Not light a match, start an engine, use a telephone or cell phone, turn on or off light switches, or do anything that may cause a spark
- Do Not attempt to operate pipeline equipment
- Do Not attempt to extinguish a propane fire
- Call 911 from a neighbor's house

### Additional information

## Propane means better living outdoors.

Did you know that propane plays a key role in everyday outdoor summer activities? Gas grills are a focal point for outdoor rooms and patios. Propane fire pits, outdoor fireplaces and chimineas add ambiance and warmth after sundown. Propane lighting and pool or hot tub heaters also provide year-round appeal.

### Year-round propane offers convenience and comfort.

- A third of homeowners report using their outdoor room year-round.
- Propane-powered bug zappers eliminate the nuisance of mosquitoes in the summer.
- Propane heaters will keep you toasty warm even when temperatures drop.
- Propane lighting illuminates outdoor spaces so you can use your outdoor room even when the sun goes down.

### With propane... the grilling never ends!

Keeping a few simple safety tips in mind can add to the overall grilling experience. The Propane Education & Research Council (PERC) offers the following tips:

- When lighting a grill, keep the top open until you are sure that it is lit.
- After connecting the cylinder to a propane gas grill burner for the first time, use a leak-detection solution (a 50/50 mixture of water and liquid soap) to check connections for tightness.
- Do not use matches or lighters to check for leaks.
- Never pour an accelerant such as lighter fluid or gasoline on the grill.
- When finished grilling, turn off the burner controls and close the cylinder valve.
- Always use or store propane cylinders outdoors in an upright (vertical) position. NEVER store or place a propane cylinder indoors or in an enclosed area such as a basement, garage, shed or tent.

## Reduce. Conserve. Install a propane tankless water heater today!

Propane tankless water heaters are the ideal choice for those who are concerned about the environment, but who also want plenty of hot water. Compared to electric water heaters, they give off less than one-half the carbon emissions and reduce standby energy loss up to 20 percent. And since propane tankless water heaters only heat water on demand, they can provide a nearly endless supply while lowering water heating bills up to 60 percent. Propane tankless water heaters — the perfect choice for your home and the planet we all call home!
